

# JORDAN ESGUERRA

SOFTWARE DEVELOPER / MULTIMEDIA DESIGNER

## ABOUT

I'm a software developer and multimedia designer based in San Diego, California, specializing in React & Node JS, searching for a full-time position as a front-end or full-stack developer.

## WORK EXPERIENCE

### Web Development

#### University City Fire Safe Council

Website developed for the San Diego University City Fire Safe Council with React, Redux, and Strapi. To meet the accelerated deadlines and requirements for the website's launch, the Strapi CMS was utilized alongside AWS S3 storage to produce a simple blog that was manageable for the site administrators. The site also uses the NASA EONET API to provide wildfire incident data alongside the Google Maps React package and API.

### MERN Application

#### Contact Keeper

A Contact Keeper application with user authentication developed with Mongo DB, Express, React and Node JS, (MERN). This application helped in developing skills using the Express framework alongside a React front-end.

### E-commerce Application

#### Jade & Aloe

An E-commerce application for a local nursery built utilizing the Stripe payment API with a custom checkout flow. Website developed with React and Bootstrap on the front end, Redux for state management, and NodeJS, Express, Firebase Cloud Functions, and Firestore DB for the backend.

### Social Media Application

#### Social Chirp

A Social Media Application with user authentication and profiles developed with React, Material UI, and Firebase. The application also utilizes Redux for state management, alongside firebase serverless cloud functions and firestore database.
